OBJECTIVES AND STRATEGY

The Heward Global Leaders Fund seeks to generate consistent risk adjusted returns over the long term by identifying high-quality global businesses that are attractively priced. These companies are typically leaders in their respective business field, have high defensible barriers to entry, strong free-cash-flow generation, solid management, high returns on invested capital and consistent return of capital via dividends. By focusing on predictable high-quality global businesses, the goal is to preserve capital during market corrections and downturns while generating value over an economic cycle. The Fund is comprised of 35-50 leading global businesses from four regions: North America, Europe, Asia-Pacific and Japan.

WHO SHOULD INVEST IN THIS FUND?

The Fund caters to investors that value capital appreciation and who seek to participate in long-term growth opportunities available in equity markets.

HOW THE FUND PERFORMED

Global markets had solid first-quarter gains despite the wars in Gaza and Ukraine, escalating tensions between China, Russia and the USA and news that Germany, Japan and the United Kingdom were in a technical recession. It is remarkable given at the beginning of the year, the futures markets was pricing in as many as six 25-basis point rate cuts by the US Federal Reserve in 2024. We never subscribed to this view. Some higher-than-expected inflation numbers in the first quarter have eased those expectations down to two or three possible rate cuts commencing in June or July. Recently, the Atlanta Federal Reserve raised their US GDP growth forecast to 2.8% for this year. Four months into 2024, a few international markets especially in Europe and Asia are at all time highs. With several foreign central banks moving toward or are already lowering their policy rates, investors have increased their exposure to stocks in these markets as investors begin to anticipate and hope that the pace of inflation eases further.

The fund is positioned in several key sectors: we like US and European banks in general. They should benefit from a steepening of the yield curve along with improving investment banking and trading activity. European banks valuations look very cheap. We like the Industrials sector with companies that have exposure to manufacturing, construction (infrastructure), aerospace and defense. Within health care we have maintained global exposure especially to European pharmaceuticals. In the cyclical area, we own global energy companies given our positive outlook on oil. With regards to gold, clients know that we have been positive on gold and gold mining shares given massive central bank buying and the unstable geopolitical environment we live in. We are constructive and positive on global markets.

QUICK FACTS AND FUND CHARACTERISTICS

CHARACTERISTICS:

- Equity portfolio with international exposure
- 35-50 Holdings
- Moderate risk
- Medium to long-term appreciation

FUND TYPE: Global Equity

REGISTERED ACCOUNT ELIGIBILITY: RRSP, RESP, RRIF, TFSA, IPP, FHSA
